BESPOKE AIRCRAFT COMPLETIONS

VIP Works For You

Your aircraft is an important part of your life and should reflect your personal style and your needs.

We will help you hone-in on your individual goals and needs and our team will assist you in bringing your vision for your aircraft to life.

Whether you want to modernize your cabin with the latest trends and technology, or you want us to undertake a complete turn-key solution for you, rest assured that we will deliver in the most cost efficient and timely manner.

Give Your Aircraft The VIP Treatment

With over 25 years of experience in private jet interior and exterior completions, our VIP team has the experience and the competence to elevate your jet with the latest industry standards and the most current product offerings.

We work with a comprehensive, world-wide network of suppliers and experienced craftsmen to offer you the best quality at unbeatable value.

When we undertake your aircraft's completion, we promise you the peace of mind of delivering on the quality and value that you, as a VIP, expect and deserve.

Complete Turn-key Solutions

At VIP Completions, we are experts at turn-key solutions and work closely with you to achieve your goals and to respect your vision.

We'll guide you through the process of selecting upgrades and retrofits that will ensure aircraft will be next-gen compliant, and that your refurbishment not only reflects your individual taste, always respecting your budget and schedule.

After all, customers have entrusted us with complete solutions for over two decades and continue to return to us for new projects, time and time again.

Your Aircraft Reimagined

As you embark on your transformation journey, we help guide you through the selection process; pulling from our vast catalog of brand-name luxury materials; our expertise will indisputably help increase the value of your jet.

So no matter what we do for you, from the smallest aesthetic improvement or a complete turn-key solution, VIP Completions is unmatched in value and scope when it comes to our range of services.

Find out exactly what we can do for you by getting in touch today.

AESTHETIC IMPROVEMENTS

Our clean, crisp and modern interior and exterior refurbishment options incorporating the latest trends from various high-end industries will undoubtedly make your aircraft more desirable to you, and anybody who flies with you.

Upholstery & Soft Goods

We work with the world's leading suppliers to find the finest fabrics and hides for your aircraft's upholstery and soft goods. Our designers will work with you through the selection of materials to create a design scheme that fits your life and your style.

We can help rejuvenate your existing veneers and hard surfaces or replace them with the finest species of wood, metal and natural stone.

Our team can breathe new life into old wood surfaces, restoring them to their original color and luster, or if you chose; using the latest processes such as hydro-dipping to create entirely new design schemes.

Cabinetry & Hard Surfaces

From the custom design of your galley, monument, or dining tables, we work in tandem with our suppliers and source the finest of materials to breathe new life into your cabinetry or hard surfaces.

Metal Plating

No cabin refurbishment is complete without taking care of the metal plating. Our team puts the shine into your aircraft with a number of options for metal accents. We can also revitalize existing brightwork with metal plating that can be done in a variety of finishes.

Complete Paint

Take advantage of your aircraft's downtime during the interior refurbishment process to also refresh its exterior. We can manage everything from new stripes and registration updates to the most intricate detail of full exterior paint jobs. We partner with the best paint facilities and provide complete oversight of the paint project to ensure outstanding results at the most competitive prices.

TECHNOLOGICAL ENHANCEMENTS

Turn your aircraft cabin into a corner office and stay connected in the air, as you would on the ground, with a technology overhaul. Install Airborne Broadband Wi-Fi to hold meetings and stay informed while in transit. Host videoconferences, place phone calls, download files, and check email so you can get to your destination without missing a beat.

Cabin Management Systems (CMS)

A good cabin management system allows you to intuitively control every element of your environment. We have developed a system based on the most robust smart home technology that controls lighting, temperature and audio visual entertainment from a single app on your tablet or phone.

Our solution delivers excellent value and puts control at your fingertips.

Audio Video

Productivity is not only about getting things done, it's also about recharging with quality downtime. We offer a full range of high definition monitors and state of the art audio solutions to create an immersive entertainment experience.

LED Lighting

Cabin lighting does much more than set the mood, it helps you relax, counter the effects of jet lag and arrive well-rested.

We can design a LED lighting solution that adapts to your needs and keeps you on top of your game wherever you land.

FUTURE PROOFING YOUR JET

Our team can identify and upgrade systems to ensure you are ready for the ever-changing regulatory requirements. We handle every aspect of next-gen compliance.
